An Interactive Neuro-Symbolic Framework to Uncover Latent Themes in Large Text Collections

To some extent, with markdown package

- (Nested) bullet and numbered lists
- Text formatting (italic, bold becomes italic + alerted)
- Redefine #### to start a block with title and ---- to end the block
- Compile with --shell-escape (Overleaf does this already)

Caveats

- Nothing too complicated!
- No verbatim or fragile stuff!
- No #and _ characters!
- (I used \texthash and \textunderscore )
- Alternatives: Pandoc, wikitobeamer

Overview

- This is the template I created for my poster presentations. [1]
- You can provide an optional \footimage. [2]

Options

- It’s based on beamerposter, so you can change some options:
  - size a0, a0b, a1, a2, a3, a4
  - orientation landscape, portrait
  - scale a decimal number to scale the fonts

Colour Themes

- I’ve included some colour themes, using the colour palettes from http://colourlovers.com
  - ComingClean (current theme)
  - Entrepreneur (light blue + grey)
  - Conspicious (a bit garish!)

Figures and images

- Image

Figure: An exemplary image

This is a sample

- One, two, pick up my shoe
- Three, four, shut the door
- Five, six, pick up sticks
- Seven, eight, lay them straight
- Nine, ten, a big fat hen
- One, two, pick up my shoe
- Three, four, shut the door
- Five, six, pick up sticks
- Seven, eight, lay them straight
- Nine, ten, a big fat hen

This is another sample

- Some maths material

\[ A = U \times S \times V^T \sigma = \frac{x \times y}{\sqrt{\alpha + \beta}} \] (1)

pipeTables and tableCaptions

<table>
<thead>
<tr>
<th>Right</th>
<th>Left</th>
<th>Default</th>
<th>Center</th>
</tr>
</thead>
<tbody>
<tr>
<td>12</td>
<td>12</td>
<td>12</td>
<td>12</td>
</tr>
<tr>
<td>123</td>
<td>123</td>
<td>123</td>
<td>123</td>
</tr>
<tr>
<td>1</td>
<td>1</td>
<td>1</td>
<td>1</td>
</tr>
</tbody>
</table>

Table: Demonstration of pipe table syntax.

This is a sample of a wiiiide column

- One, two, pick up my shoe
- Three, four, shut the door
- Five, six, pick up sticks
